## Pulled Muscles, Muscle Strain and Scar Tissue Treatment

A scar is an area of fibrous tissue that replaces normal skin after an injury. Scars result from the biological process of wound repair in the skin, as well as in other organs and tissues of the body. Thus, scarring is a natural part of the healing process.

Scar tissue pain: What it feels like, why it happens, and

Scar tissue replaces normal skin tissue after the skin is damaged. Though scar tissue is made up of the same substance as undamaged skin, it looks different because of the way the fibers in the tissue are arranged.

### What is Scar Tissue? (with pictures) - wiseGEEK

The scar tissue causes the urethra to become narrow, making it more difficult for urine to flow. Sometimes, the inflammation or injury to the urethra happens long before the stricture becomes noticeable. In other cases, the stricture happens soon after a urethral injury. What are the symptoms of urethral stricture?

### Urethral Stricture: Symptoms, Causes, Treatment & Prevention
